Providers click here for more info

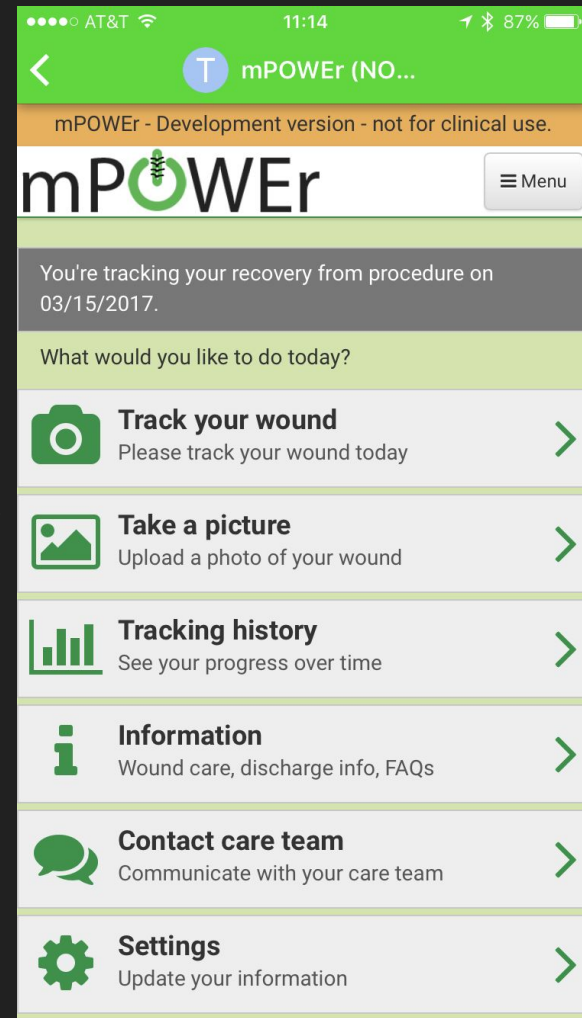

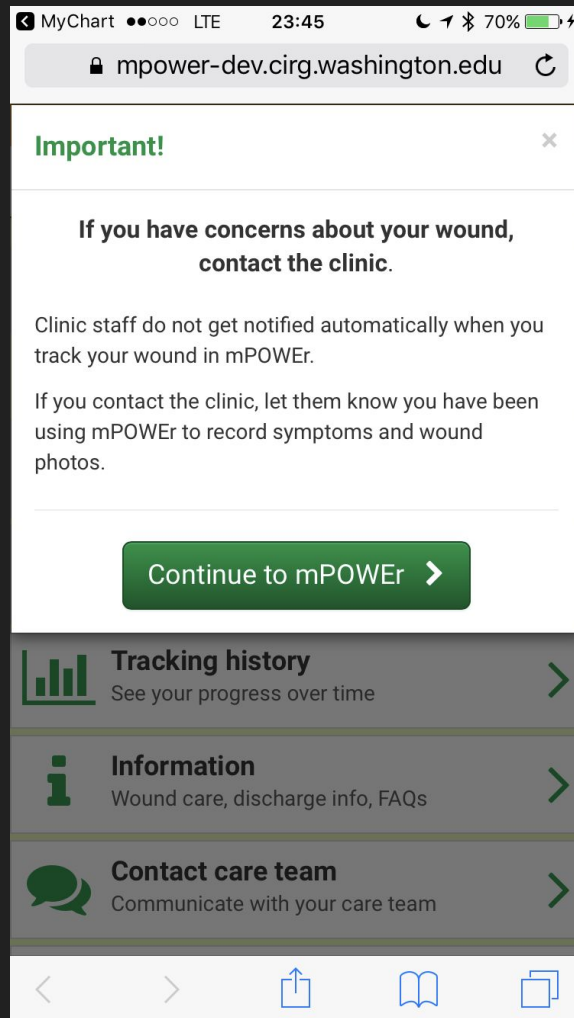

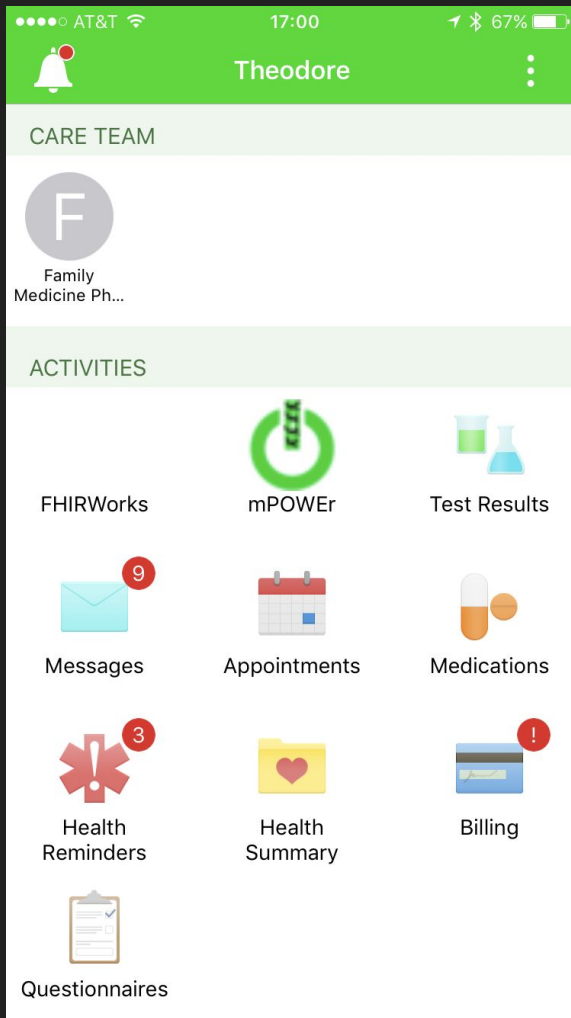

mPOWEr, which stands for Mobile Post-Operative Wound Evaluator, is an application ("app") for your phone and lets YOU be an active participant in your care. It's an electronic diary that allows you to:

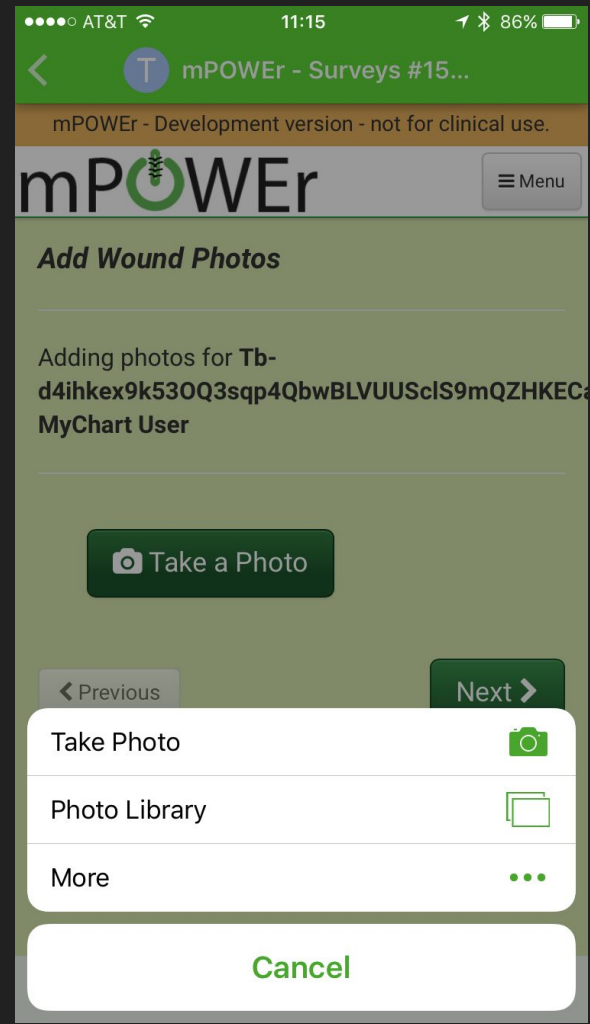

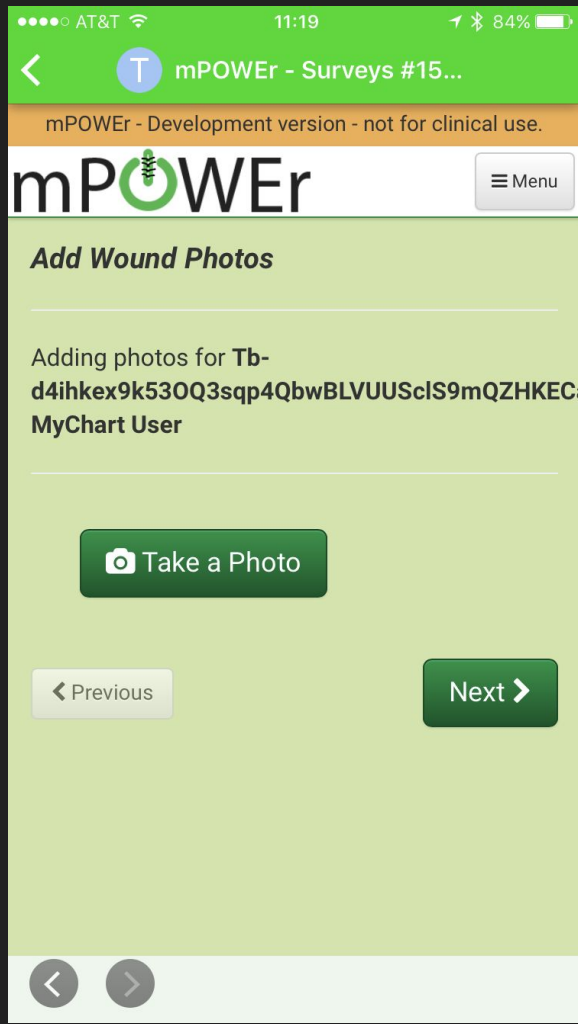

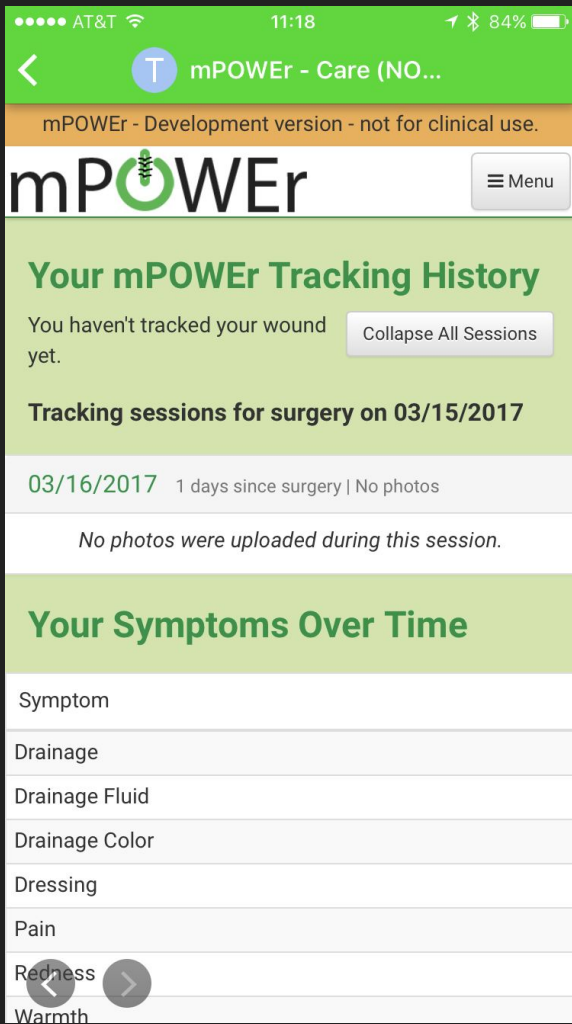

- Record symptoms about the healing of your wound
- **Clinic staff will only see mPOWEr entries if you have called the clinic with a concern and remind them on the phone that you have used mPOWEr**
- Upload photos of your wound
- Share this information with your surgical team
